

M-120

Supercritical CO₂ Extractor

DESCRIPTION

The extraktLAB M-120 extractor is the manual version of our E-140 extractor providing you the most powerful manual CO₂ extraction machine on the market today. The machine is designed to provide a high yield in a short period of time. The idea behind the M-120 is to provide an avenue for those looking to get in the processing space at the ground level by having reliable equipment to do so.

extraktLAB's supercritical CO₂ extraction equipment can run a variety of extraction methods.

MANUAL MACHINE SPECIFICATIONS

- Supercritical CO₂ Extraction Machine
 - 5,000 psi
 - 20L Extraction Cylinder (one)
 - 20L Collector (one)
 - 20L Recycler (one)
 - 316, 304, 17-4. Ph Stainless Steel
- Footprint:** 24 ft²
Dimensions: 99"x34"x72" (LxWxH)
Sound Pressure: 50dB
Electrical: 208-240V, 3 phase, 67 FLA
Compliance: UL 508A Motor Starter, No Panel, ASME Section VII Div 2
Wetted Materials: FDA Approved Structural Stainless Steel
Warranty: 18 months
- Includes Chiller.
CRN & PED numbers available upon request
Compliance Certifications Package Available (80-9606)

Manufactured in the USA by United Science.
